

WHAT'S NEW

# MYOB AccountEdge + AccountEdge Network Edition v11

INTRODUCING THE VERY LATEST MYOB ACCOUNTEDGE, SOFTWARE DEVELOPED SPECIFICALLY FOR YOUR MAC.

An app for your Apple iPad and iPhone devices is now available. Whether you're in the office or on the road, business life on a Mac just got easier.

---

## Create progress invoices for each stage of work

You can now use Progress Billing to invoice by percentage of work, dollar amount, individual task or remaining value for each stage of work, right through to job completion. AccountEdge will manage the invoicing of the entire project from start to finish. You can even invoice in excess of 100% of the original quote for outages, change orders and expenses.

## Save time by converting purchases to invoices

We've made it easier to invoice any items or services you buy for resale to a customer. Simply convert the purchase order straight into a sales invoice and it's done – at the click of a button.

## Quickly view profitability on item-based sales

When you're raising a sales quote and invoice for items, you often want to check the profit margin on the sale. AccountEdge now gives you the flexibility to view and adjust prices on the fly, before you commit to recording the invoice. It's all about helping you make the best decisions for your business.

## More flexible, faster search

Save time using improved search options. For example choose to search by item name and only items that contain the keyword you use will show up. Search by name, description or item number when you're on the hunt for a specific client, supplier or item.

## Better organise your inventory items

AccountEdge allows you to store more information such as a brand name, images or a custom tag against an item, making it easier to categorise and filter your lists and reports.

## Customise reports and forms

We've also improved graphics and font handling giving you flexibility when creating PDF invoices, statements and receipts. With AccountEdge, your documents will have a professional 'on-brand' appearance.

## iPad and iPhone integration

Download the AccountEdge app and complete basic business transactions such as quotes, orders and invoices on your iPhone or iPad. Anywhere, Anytime. Easy.
